

Sorting bucket SKB

For all excavators between 3,300–57,300 lbs (1.5–26 metric ton)

The SKB sorting bucket is designed to more easily get beneath the material intended for sorting. It has a somewhat narrower shape than the engcon SB sorting bucket and its long base and low side panels make it easier to get beneath e.g. asphalt or other material intended for sorting.

The base ribs run along the length of the bucket, allowing material to slide easily in and out. The SKB sorting bucket requires no hydraulics and is thus ideal for simple sorting where e.g. finer material is required for backfill or some other use.

The cutters, lower side plates and ribs are made of high-strength wear bar with a hardness of up to 500 Brinell, thus guaranteeing maximum efficiency and long service life.

Specifications

Model	SKB02	SKB04	SKB06	SKB09	SKB14	SKB17	SKB23
Volume (y³):	0.09	0.22	0.29	0.52	0.81	1.11	1.7
Width: (inches)	23.6	23.6	31.5	39.4	51.2	51.2	59.1
Gap: (inches)	1.7	1.6	1.9	2	2.4	2.4	2.4
Weight: (lbs)	108	238	365	640	1,091	1,329	2,358
Top bracket:	S30	S40	S45	S45	S60	S60	S70
Base machine weight [lbs]:	3,300 –6,600	4,400 –8,800	13,200 –15,400	15,400 –26,400	28,600 –30,800	35,200 –39,600	48,500 –57,300
