

Lightweight pallet fork

Lightweight pallet fork for excavators between 4,400–13,200 lbs (2–6 metric ton)

The new and lightweight pallet fork comes in two versions, one hydraulic and one mechanical and it can handle a load of 2 tonnes of TP500 which means that it is rated for 2 tonnes of load 500 mm out from the back edge of the forks. The weights are calculated at 141 kg for the mechanical and 151 kg for the hydraulic pallet fork and the standard length of the forks is 800 mm.

The hydraulic version is adapted for engcon's automatic quick hitch system EC-Oil enabling the driver to connect the pallet fork and its hydraulics automatically without stepping out of the cab. The hydraulic pallet fork with EC-Oil fits perfectly with our new EC206, which later in the year will be equipped with our automatic quick coupler.

Specifications

Type	GHH1000L	GH1000L
Recommended machine weight (lbs)	4,400–13,200	4,400–13,200
Standard hitch	S40 with EC-Oil	S40
Estimated weight (lbs)	333	311
Dimension (inch)	3.1x1.6x31.5	3.1x1.6x31.5
Width (inch)	39.4	39.4
Tine length (inch)	31.5 (47.2 also available)	31.5
TP500 (lbs)	4,400	4,400
