

# Deep-digging bucket

For all excavators between 3,300–72,700 lbs (1.5–33 metric ton)

**engcon deep-digging bucket** – Robust design for tough jobs. A favorite for anyone needing to excavate and dig in difficult conditions where fast penetration and easy filling are priorities, e.g. in trenching and other soil removal requiring capacity.

**On request, the bucket can be fitted with the following accessories:**

» Tooth kit\*

\* When selecting a tooth kit, engcon buckets are fitted with the Cat J tooth system. For other tooth systems, check availability with engcon
