

Detachable Sweeper

For all excavators in the 6-16 tonne weight classes

The Detachable Sweeper (SWD) – Engcon's detachable rotating brush – can also be retrofitted.

Just like with the gripper cassette GRD, the SWD rotating brushes can be retrofitted simply on the Q-Safe-D quick hitch by being hooked onto the hitch's two mounting hooks. The rotating brushes are then locked and connected to the hydraulics in a single action – quick and easy.

SWD is driven by a powerful hydraulic motor and is raised or lowered by a hydraulic ram.

The SWD is flexible and its width can be adjusted for the job in hand, from cable sweeping to sweeping large areas.

This reduces the need for manual labour and makes a safer workplace. SWD is available in several widths and is adapted for the new Engcon Q-Safe Detachable quick hitch.
